

REPLICATION HELP FOR THE PAPER

"Ability peer effects in university: Evidence from a randomized experiment"
by Booiij, Leuven & Oosterbeek.

All data are in Stata format

For replication do the following

1. Create a folder for the paper, say `Ability`.
2. Put the data in subfolder `Ability\data`
3. Put the all the do and ado files in `Ability`
4. Open Stata and goto `cd Ability`
5. Run the file `crwork.do` in Stata to get the working dataset
6. Run `analysis.do` in Stata to get the main figures and tables
7. Run `analysis_priordists.do` in Stata to get the assignment distributions

An explanation of the variables can be found typing "`desc`". The labels of the survey questions are in Dutch. The corresponding translations can be found in table C1 of the paper.
